

Denoval Muhammad Rosyadi

About me

I am a Software Engineering graduate from SMK Taruna Bhakti with experience in full-stack web and mobile development, as well as UI/UX, visual design, and graphic design.
In addition to application development, I design intuitive user interfaces and create engaging user experiences for web and mobile applications. I also create visual content such as posters, banners, social media designs, infographics, social media video content, and various other digital assets.
I have a strong interest in technology and design, enjoy learning new skills, collaborating with teams, and creating digital products that are scalable, user-friendly, and visually appealing.

Soft skils

- Comunication
- Critical Thingking
- Teamwork
- Problem solving
- Adaptability
- Creative Thingking

MY PORTOFOLIO

WargaCare - web

Developed WargaCare, a web-based public complaint management system that allows citizens to submit and monitor complaints while enabling administrators to manage reports efficiently. Built with Next.js, TypeScript, Tailwind CSS, Express.js, and MySQL, featuring JWT authentication and REST API integration.

Some of my designs :

These are some of my designs as a graphic designer, using the Canva application or website and many other designs.

WargaCare - mobile

Developed WargaCare Mobile, a mobile-based public complaint management application that enables citizens to submit, monitor, and manage complaints directly from their smartphones. Built using React Native (Expo), TypeScript, Express.js, and MySQL, with JWT authentication and REST API integration to deliver a secure, responsive, and user-friendly experience.

Wixie - UI Design

Designed Wixie, an on-demand service application prototype using Figma. The app provides transportation and lifestyle services while featuring accessibility-focused solutions for elderly users and people with disabilities. Focused on creating a modern, intuitive, and inclusive user experience through user-centered UI/UX design.

see in figma

Office Management System - UI Design

Developed a responsive web-based Office Management System to streamline daily administrative operations. The system includes user authentication, employee attendance management, inventory tracking, sales management, and an interactive dashboard for monitoring business activities. Designed with a clean and user-friendly interface to improve productivity and data management.
